Skylights

Introducing
Commercial
SUN TUNNEL™ skylights
Capturing daylight for the workplace

Take it from the top... VELUX SunCurve

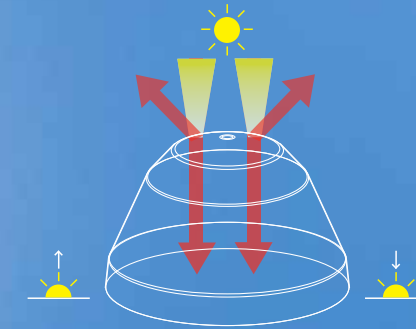

This highly transmissive light capturing VELUX SunCurve comes standard on every 22" commercial SUN TUNNEL™ skylight.

- Designed to capture sunrays that would normally pass through the dome, and instead directs them down the tunnel.

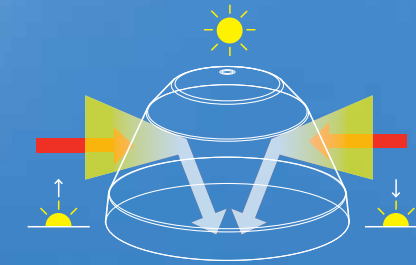

22" kit includes outer dome and VELUX SunCurve

What makes the VELUX SunCurve better?

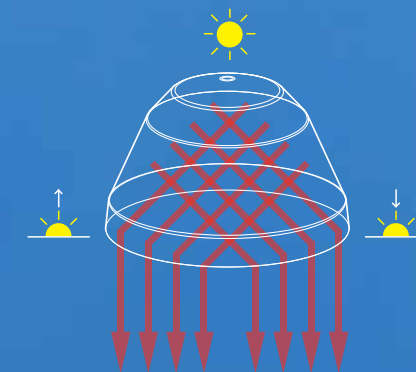

Mid-Day

Manage the intense, direct mid-day sun so that the space below is bright and comfortable without glare.

Morning and afternoon light

Captures low-angle sunlight and curves it down the tunnel.

Consistent light levels

Evenly distribute sunlight for bright and comfortable light levels in the space below.

Choose the right flashing type for your installation:

Flat roof applications:

Self

Curb

Pitched roof applications:

Pitched
(14" only)

Flat roof applications:

Self

Curb

Roof-level accessories that increase performance:

bars, tamper resistant
dome and curb fasteners.

From point A to point B

Mid-level accessories that increase the ease of installation and control light output:

*Elbows
(ZTE)*

*Rotating couplers
(ZTZ 211)*

*Daylight controller/
Power supply
(ZTP/KES 160)*

Flexi Loc™ quick assembly system

A tunnel connection system that reduces tunnel installation time in half. With our unique Flexi Loc™ system, screws are a thing of the past. Use this unique clip system to piece your elbows, tunnel sections and other rigid tunnel components together quicker.

Highly reflective silver tunnel

**20-year
rigid tunnel
reflective
warranty**

All VELUX SUN TUNNEL skylights feature a highly reflective silver layer that is electrostatically applied.

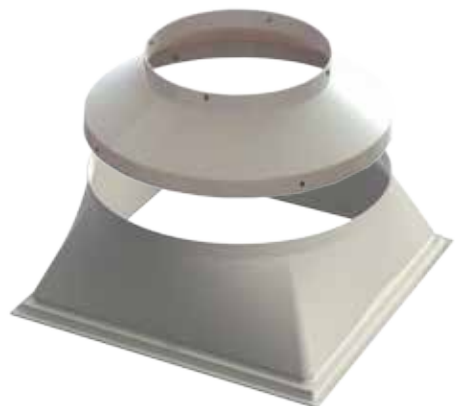

- Creates an ultra smooth highly, reflective surface
- Greater than 98% total reflectivity (99.9% on silver layer)

The finishing touch

Choose from a variety of ceiling options to meet all of your application needs.
Available in 14" and 22"

Hard ceiling

Suspended ceiling

Open ceiling (shown)

Diffuser options

Frosted diffuser
Frosted diffusers offer a combination of performance and aesthetics.

Prismatic diffuser
The industry standard prismatic diffusers provide good light distribution with the look and feel to match existing architectural design.

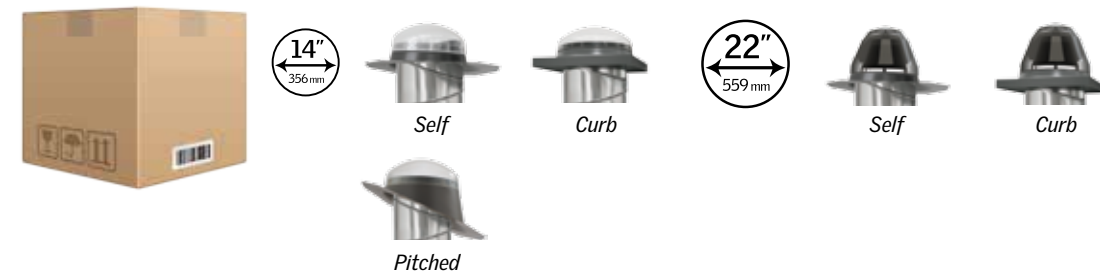

Fresnel diffuser
Fresnel diffusers utilize a concentric honeycomb pattern of parabolic prisms to maximize light diffusion.
